

Use addition strategies with place value to solve.

Ex)  $854 - 594 = \underline{260}$   
 $4 - 4 = 0$   
 $50 - 90 = -40$   
 $800 - 500 = \underline{300}$   
 $260$

2)  $124 + 771 = \underline{895}$   
 $4 + 1 = 5$   
 $20 + 70 = 90$   
 $100 + 700 = \underline{800}$   
 $895$

4)  $464 + 169 = \underline{633}$   
 $4 + 9 = 13$   
 $60 + 60 = 120$   
 $400 + 100 = \underline{500}$   
 $633$

6)  $822 - 658 = \underline{164}$   
 $2 - 8 = -6$   
 $20 - 50 = -30$   
 $800 - 600 = \underline{200}$   
 $164$

8)  $774 - 529 = \underline{245}$   
 $4 - 9 = -5$   
 $70 - 20 = 50$   
 $700 - 500 = \underline{200}$   
 $245$

10)  $520 - 437 = \underline{83}$   
 $0 - 7 = -7$   
 $20 - 30 = -10$   
 $500 - 400 = \underline{100}$   
 $83$

1)  $2 + 442 = \underline{444}$   
 $2 + 2 = 4$   
 $0 + 40 = 40$   
 $0 + 400 = \underline{400}$   
 $444$

3)  $439 + 101 = \underline{540}$   
 $9 + 1 = 10$   
 $30 + 0 = 30$   
 $400 + 100 = \underline{500}$   
 $540$

5)  $584 - 399 = \underline{185}$   
 $4 - 9 = -5$   
 $80 - 90 = -10$   
 $500 - 300 = \underline{200}$   
 $185$

7)  $673 + 275 = \underline{948}$   
 $3 + 5 = 8$   
 $70 + 70 = 140$   
 $600 + 200 = \underline{800}$   
 $948$

9)  $96 + 283 = \underline{379}$   
 $6 + 3 = 9$   
 $90 + 80 = 170$   
 $0 + 200 = \underline{200}$   
 $379$

11)  $227 + 608 = \underline{835}$   
 $7 + 8 = 15$   
 $20 + 0 = 20$   
 $200 + 600 = \underline{800}$   
 $835$

Answers

Ex.  $\underline{260}$

1.  $\underline{444}$

2.  $\underline{895}$

3.  $\underline{540}$

4.  $\underline{633}$

5.  $\underline{185}$

6.  $\underline{164}$

7.  $\underline{948}$

8.  $\underline{245}$

9.  $\underline{379}$

10.  $\underline{83}$

11.  $\underline{835}$
