Answers

1) For a party Henry spent five dollars on food and three dollars on
    drinks. How much did Henry spend total?   Add To
                                                                     (Result Unknown)

2) A store has five shirts. Later they got in four more shirts. How many
    shirts does the store have now?   Add To
                                                                     (Result Unknown)

3) Emily spent three minutes drawing at school and two minutes
    drawing at home. How many minutes total did she spend drawing?   Add To
                                                                     (Result Unknown)

4) Billy owned eight baseball cards. For his birthday he got two more.
    How many cards does Billy have total?   Add To
                                                                     (Result Unknown)

5) A fast food restaurant sold five small hotdogs and five large
    hotdogs. How many hotdogs did they sell total?   Add To
                                                                     (Result Unknown)

6) A baker already had three cakes but made two extra. How many
    cakes did the baker have total?   Add To
                                                                     (Result Unknown)

7) A restaurant sold six sodas in the morning and two in the afternoon.
    How many sodas did they sell total?   Add To
                                                                     (Result Unknown)

8) In the first half of a trivia game Dave scored seven points. In the
    second half he scored two points. How many points did he score
    total?   Add To
                                                                     (Result Unknown)

9) Isabel had two books. If she bought eight more at a yard sale how
    many would she have total?   Add To
                                                                     (Result Unknown)

10) There were four people in line at lunch when two more got in line.
    How many people were there total in line?   Add To
                                                                     (Result Unknown)

11) For Halloween Kaleb got six ounces of candy and Maria got two
    ounces of candy. What is the combined weight they received?   Add To
                                                                     (Result Unknown)

12) A pet store had seven kittens. If they got another three kittens, how
    many would they have total?   Add To
                                                                     (Result Unknown)
