

**Solve each problem.**

**Answers**

- 1) Frank stacked 7 pieces of wood on top of one another. If each piece was  $\frac{10}{12}$  of a foot tall, how tall was his pile?
- 2) Carol bought a couple packages of gum at the gas station and ate  $\frac{3}{4}$  of a package each week. How much would she have eaten after 7 weeks?
- 3) Bianca needed  $\frac{1}{2}$  of a cup of water for 1 flower. If she had 3 flowers how many cups would she need?
- 4) Tiffany was packing up some of her old stuff into a box. A box can hold 2 pounds, but she only filled it up  $\frac{1}{4}$  full. How much weight was in the box?
- 5) Victor lived 3 miles from his school. If he rode his bike  $\frac{7}{10}$  of the distance and then walked the rest, how far did he ride his bike?
- 6) Each day a company used  $\frac{2}{5}$  of a box of paper. How many boxes would they have used after 4 days?
- 7) When Haley's 3DS is fully charged it lasts for 4 hours. If she only charged it  $\frac{2}{3}$  full, how long would it last?
- 8) Rachel made spicy and regular chili for the chili cook-off. She made enough spicy to fill up  $\frac{6}{8}$  of a pot. If she made 4 times as much regular, how many pots of regular did she have?
- 9) A restaurant used 5 pounds of potatoes during a lunch rush. If they used  $\frac{1}{6}$  as much beef, how many pounds of beef did they use?
- 10) A pitcher could hold  $\frac{2}{6}$  of a gallon of water. If George filled up 8 pitchers, how much water would he have?
- 11) Jerry ran 7 miles on his first day of training. The next day he ran  $\frac{3}{5}$  that distance. How far did he run the second day?
- 12) A group of 6 friends each received  $\frac{2}{3}$  of a pound of candy. How much candy did they receive total?

**Solve each problem.**

**Answers**

- 1) A bakery used 7 cups of flour to make a full size cake. If they wanted to make a cake that was  $\frac{1}{2}$  the size, how many cups of flour would they need?
- 2) A restaurant used 6 pounds of potatoes during a lunch rush. If they used  $\frac{7}{10}$  as much beef, how many pounds of beef did they use?
- 3) Emily made spicy and regular chili for the chili cook-off. She made enough spicy to fill up  $\frac{1}{2}$  of a pot. If she made 8 times as much regular, how many pots of regular did she have?
- 4) Billy ran 9 miles on his first day of training. The next day he ran  $\frac{3}{12}$  that distance. How far did he run the second day?
- 5) Adam stacked 3 pieces of wood on top of one another. If each piece was  $\frac{2}{3}$  of a foot tall, how tall was his pile?
- 6) A group of 7 friends each received  $\frac{9}{12}$  of a pound of candy. How much candy did they receive total?
- 7) Robin was packing up some of her old stuff into a box. A box can hold 3 pounds, but she only filled it up  $\frac{4}{6}$  full. How much weight was in the box?
- 8) A chef cooked 5 kilograms of mashed potatoes for a dinner party. If the guests only ate  $\frac{1}{2}$  of the amount he cooked, how much did they eat?
- 9) Isabel collected 9 times as many bags of cans as her friend. If her friend collected  $\frac{5}{6}$  of a bag. How many bags did Isabel collect?
- 10) Olivia bought a couple packages of gum at the gas station and ate  $\frac{2}{10}$  of a package each week. How much would she have eaten after 6 weeks?
- 11) On Monday it snowed 3 inches. The next day it snowed  $\frac{1}{2}$  that amount. How much did it snow on the second day?
- 12) Tom's hair was originally 5 inches long. He asked her hair dresser to cut  $\frac{3}{4}$  of it off. How many inches did he have cut off?
