

Solve each problem.

- 1) The table below show the points Rachel scored on a video game each time she played.

Game #	Points Scored
1	148
2	127
3	152

After the first 3 games, she took a break and came back the next day and scored 6 times as many points as she had during all the previous games combined. How many fewer points did she score before her break than she scored after her break?

- 2) The table below show the pounds of candy a company sold in the months leading up to October.

Month	Pounds of Candy Sold
June	146
July	133
August	118
September	153

In October they sold 2 times as many pounds of candy as they did in the previous 4 months combined. How many more pounds did they sell in October than were sold in the previous 4 months?

- 3) The table below shows the number of books Isabel read the first 3 months of school.

Month	Books Read
1	21
2	20
3	34

If Jerry read 5 times as many books as Isabel, how many more books did Jerry read?

- 4) The table below show the number of play tickets sold (excluding the first week).

Week	Tickets sold
2	101
3	144
4	199
5	105
6	127

In the first week there were 5 times as many tickets sold as there were in the next 5 weeks. How many more tickets were sold in the first week than in the remaining weeks?
