

**Solve each problem.****Answers**

- 1) The school's debate team had four boys and fourteen girls on it. If they were split into groups of nine how many groups could they make?
- 2) Katie's class is going on a field trip to the zoo. If each van can hold six people and there are forty students and eight adults going, how many vans will they need?
- 3) Debby and her friends were recycling paper for their class. For every four pounds they recycled they earned 1 point. If Debby recycled eighteen pounds and her friends recycled eighteen pounds, how many points did they earn?
- 4) Adam was organizing his baseball cards in a binder with five on each page. If he had thirty-four new cards and six old cards to put in the binder, how many pages would he use?
- 5) While playing at the arcade, Will won five tickets playing 'whack a mole' and seven tickets playing 'skee ball'. If he was trying to buy candy that cost three tickets a piece, how many could he buy?
- 6) A vase can hold six flowers. If you had three carnations and twenty-seven roses, how many vases would you need to hold the flowers?
- 7) At a company picnic twenty-seven managers and three employees decided to start a game of volleyball. If they split into six teams how many people would be on each team?
- 8) Sam was helping the cafeteria workers pick up lunch trays, but he could only carry four trays at a time. If he had to pick up ten trays from one table and six trays from another, how many trips will he make?
- 9) A group of seven friends went into a restaurant. The chef already had twenty-four chicken wings cooked but cooked thirty-nine more for the group. If they each got the same amount how many would each person get?
- 10) For Halloween Olivia received twenty-one pieces of candy from neighbors and six pieces from her older sister. If she only ate nine pieces a day, how long would the candy last her?
