Two Step Problems

Name:

Solve each problem.

1) Dave made seven dollars mowing lawns and twenty dollars weed eating. If he only spent three dollar a week, how long would the money last him?

1. _____

2. _____

2) A group of four friends went into a restaurant. The chef already had sixteen chicken wings cooked but cooked twelve more for the group. If they each got the same amount how many would each person get?

3. _____

4. _____

3) While playing at the arcade, Tom won twenty-two tickets playing 'whack a mole' and two tickets playing 'skee ball'. If he was trying to buy candy that cost eight tickets a piece, how many could he buy?

5. _____

6. _____

4) The school's baseball team had nineteen new players and seventeen returning players. If the coach put them into groups with four players in each group, how many groups would there be?

7. _____

8. _____

5) Bianca and her friends were recycling paper for their class. For every four pounds they recycled they earned 1 point. If Bianca recycled twenty-one pounds and her friends recycled three pounds, how many points did they earn?

9. _____

10. _____

6) The school's debate team had twenty boys and sixty-one girls on it. If they were split into groups of nine how many groups could they make?

7) Carol's old washing machine could only wash four pieces of clothing at a time. If she had to wash twenty-five shirts and three sweaters how many loads would she have to do?

8) For Halloween Faye received twenty-nine pieces of candy from neighbors and thirty-four pieces from her older sister. If she only ate nine pieces a day, how long would the candy last her?

9) Maria's class is going on a field trip to the zoo. If each van can hold nine people and there are twelve students and thirty-three adults going, how many vans will they need?

10) Emily was making baggies of cookies with six cookies in each bag. If she had five chocolate chip cookies and thirty-one oatmeal cookies, how many baggies could she make?

Name:

Solve each problem.

1) Dave made 7 dollars mowing lawns and 20 dollars weed eating. If he only spent 3 dollar a week, how long would the money last him?

1. _____

2. _____

2) A group of 4 friends went into a restaurant. The chef already had 16 chicken wings cooked but cooked 12 more for the group. If they each got the same amount how many would each person get?

3. _____

4. _____

3) While playing at the arcade, Tom won 22 tickets playing 'whack a mole' and 2 tickets playing 'skee ball'. If he was trying to buy candy that cost 8 tickets a piece, how many could he buy?

5. _____

6. _____

4) The school's baseball team had 19 new players and 17 returning players. If the coach put them into groups with 4 players in each group, how many groups would there be?

7. _____

8. _____

5) Bianca and her friends were recycling paper for their class. For every 4 pounds they recycled they earned 1 point. If Bianca recycled 21 pounds and her friends recycled 3 pounds, how many points did they earn?

9. _____

10. _____

6) The school's debate team had 20 boys and 61 girls on it. If they were split into groups of 9 how many groups could they make?

7) Carol's old washing machine could only wash 4 pieces of clothing at a time. If she had to wash 25 shirts and 3 sweaters how many loads would she have to do?

8) For Halloween Faye received 29 pieces of candy from neighbors and 34 pieces from her older sister. If she only ate 9 pieces a day, how long would the candy last her?

9) Maria's class is going on a field trip to the zoo. If each van can hold 9 people and there are 12 students and 33 adults going, how many vans will they need?

10) Emily was making baggies of cookies with 6 cookies in each bag. If she had 5 chocolate chip cookies and 31 oatmeal cookies, how many baggies could she make?
