

Solve each problem.

- 1) While playing a trivia game, Will answered five questions correct in the first half and five questions correct in the second half. If each question was worth five points, what was his final score?
- 2) While shopping for music online, Maria bought five country albums and five pop albums. Each album came with a lyric sheet and had four songs. How many songs did Maria buy total?
- 3) Faye had seven pages of math homework and two pages of reading homework. If each page had eight problems on it, how many problems did she have to complete total?
- 4) Sarah's favorite band was holding a concert where tickets were nine dollars each. Sarah bought two tickets for herself and her friends and three extra tickets in case anyone else wanted to go. How much did she spend?
- 5) Cody bought seven boxes of chocolate candy and three boxes of caramel candy. If each box has seven pieces inside it, how much candy did he have total?
- 6) Tiffany was organizing her book case making sure each of the shelves had exactly four books on it. If she had eight shelves of mystery books and two shelves of picture books, how many books did she have total?
- 7) A waiter had nine tables he was waiting on, with seven women and two men at each table. How many customers total did the waiter have?
- **8**) George was collecting cans for recycling. On Saturday he filled seven bags up and on Sunday he filled two more bags. If each bag had five cans in it, how many cans did he pick up total?
- 9) Mike was working as a sacker at a grocery store where he made seven dollars an hour. On Monday he worked five hours and on Tuesday he worked three hours. How much money did Mike make in those two days?
- 10) At the town carnival Henry rode the ferris wheel two times and the bumper cars two times. If each ride cost five tickets, how many tickets did he use?
