

Solve each problem.

- 1) Luke was working as a sacker at a grocery store where he made six dollars an hour. On Monday he worked six hours and on Tuesday he worked two hours. How much money did Luke make in those two days?
- 2) Mike and his friend were buying trick decks from the magic shop for four dollars each. How much did they spend if Mike bought six decks and his friend bought three decks?
- 3) Victor was collecting cans for recycling. On Saturday he filled six bags up and on Sunday he filled four more bags. If each bag had seven cans in it, how many cans did he pick up total?
- 4) Isabel's favorite band was holding a concert where tickets were four dollars each. Isabel bought five tickets for herself and her friends and two extra tickets in case anyone else wanted to go. How much did she spend?
- 5) While playing a trivia game, George answered seven questions correct in the first half and two questions correct in the second half. If each question was worth eight points, what was his final score?
- 6) Rachel was playing a video game where she scores nine points for each treasure she finds. If she found seven treasures on the first level and two on the second, what would her score be?
- 7) Carol was unboxing some of her old winter clothes. She found seven boxes of clothing and inside each box there were six scarves and four mittens. How many pieces of winter clothing did Carol have total?
- 8) Billy bought five boxes of chocolate candy and five boxes of caramel candy. If each box has six pieces inside it, how much candy did he have total?
- **9)** April's discount flowers was having a sale where each flower was four dollars. If Janet bought eight roses and two daisies, how much did she spend?
- 10) A waiter had three tables he was waiting on, with four women and three men at each table. How many customers total did the waiter have?
