**Determine which choice shows the expression used to solve the problem.**

1)  Faye's mom was buying extra school supplies for Faye and her sister. She bought fourteen packs
    of glue sticks total. If she gave Faye five packs, how many did her sister get?

    A.  $14 + 5$              B.  $14 - 5$              C.  $14 \times 5$              D.  $14 \div 5$

1. _____

2. _____

2)  An industrial machine made twenty-four shirts. It can make a eight shirts a minute. How many
    minutes was the machine working?

    A.  $24 + 8$              B.  $24 - 8$              C.  $24 \times 8$              D.  $24 \div 8$

3. _____

4. _____

3)  Katie's dad was taking everyone out to eat for her birthday. He spent five dollars total on the
    adults and seven dollars total on the kids. How much did it cost for everyone?

    A.  $5 + 7$              B.  $7 - 5$              C.  $5 \times 7$              D.  $7 \div 5$

5. _____

6. _____

4)  At the fair the roller coaster can hold forty-five people total. If each car has five seats, how many
    cars are there?

    A.  $45 + 5$              B.  $45 - 5$              C.  $45 \times 5$              D.  $45 \div 5$

7. _____

8. _____

5)  Isabel had to complete eight pages of homework. Each page had four problems on it. How many
    problems did she have to complete total?

    A.  $8 + 4$              B.  $8 - 4$              C.  $8 \times 4$              D.  $8 \div 4$

9. _____

10. _____

6)  At the state fair Edward spent seven tickets on the roller coaster and three tickets on the ferris
    wheel. How many tickets did he spend total?

    A.  $7 + 3$              B.  $7 - 3$              C.  $7 \times 3$              D.  $7 \div 3$

7)  Mike bought his family twelve pieces of chicken for dinner. If they only ate three, how many
    pieces does he have left?

    A.  $12 + 3$              B.  $12 - 3$              C.  $12 \times 3$              D.  $12 \div 3$

8)  Cody was drawing on scrap paper. He could fit five drawings on each page. If he has eight pages,
    how many drawings can he make?

    A.  $5 + 8$              B.  $8 - 5$              C.  $5 \times 8$              D.  $8 \div 5$

9)  Bianca is making bead necklaces for her friends. She has eighteen beads and each necklace takes
    nine beads. How many necklaces can Bianca make?

    A.  $18 + 9$              B.  $18 - 9$              C.  $18 \times 9$              D.  $18 \div 9$

10)  For Olivia's birthday five of her friends gave her eight dollars. How much money did she get for
     her birthday?

    A.  $5 + 8$              B.  $8 - 5$              C.  $5 \times 8$              D.  $8 \div 5$
