Solve each problem.

1) A company was offering a special on cell phones for $3 each. But only if you spent 8 dollars a month for 4 months. How much would it end up costing you total if you bought 1 phone?

2) At band practice there were 8 rows of students with 4 students in each row and then another 9 students in the back. How many students were there total?

3) A music teacher had 4 recorders, but she decided to buy 7 more boxes with each box having 9 recorders in it. How many recorders did she have after buying the 7 boxes?

4) At a comic convention Lana wanted to buy 3 comics, but each one costs 6 dollars, plus it costs 9 to even get in. How much money should she take with her so she can get in and buy what she wants?

5) It takes 9 ounces of cheese to make a burrito and 5 ounces for a taco. If you wanted 4 burritos and 1 taco how many ounces of cheese would you need?

6) While playing a game Henry defeated 6 enemies. Each enemy earned him 2 points. Then he got another 8 points for completing the level. How many points did he earn total?

7) A pet store sold 8 kittens and 1 puppy over the weekend. The kittens sold for $5 each and the puppy sold for $9. How much money did they earn from selling the pets?

8) Emily bought an app that cost $2 dollars. Then each month you have to pay $5 to play online. If she played the game online for 8 months, how much money would she have spent total for the app and the online access?

9) At the arcade Sarah had 6 tickets she saved from the last time she went. This time she played a game 2 times and earned 9 tickets each time she played. How many tickets does she have now?

10) Gwen had 4 math problems to complete. She spent about 9 minutes on each problem and then she spent 6 minutes checking her answers. How many minutes did she spend total?

Solve each problem.

1) A company was offering a special on cell phones for $3 each. But only if   8×4=32
    you spent 8 dollars a month for 4 months. How much would it end up   32+3=35
    costing you total if you bought 1 phone?

2) At band practice there were 8 rows of students with 4 students in each   8×4=32
    row and then another 9 students in the back. How many students were   32+9=41
    there total?

3) A music teacher had 4 recorders, but she decided to buy 7 more boxes   7×9=63
    with each box having 9 recorders in it. How many recorders did she have   63+4=67
    after buying the 7 boxes?

4) At a comic convention Lana wanted to buy 3 comics, but each one costs 6   3×6=18
    dollars, plus it costs 9 to even get in. How much money should she take   18+9=27
    with her so she can get in and buy what she wants?

5) It takes 9 ounces of cheese to make a burrito and 5 ounces for a taco. If   4×9=36
    you wanted 4 burritos and 1 taco how many ounces of cheese would you   36+5=41
    need?

6) While playing a game Henry defeated 6 enemies. Each enemy earned him   6×2=12
    2 points. Then he got another 8 points for completing the level. How   12+8=20
    many points did he earn total?

7) A pet store sold 8 kittens and 1 puppy over the weekend. The kittens sold   8×5=40
    for $5 each and the puppy sold for $9. How much money did they earn   40+9=49
    from selling the pets?

8) Emily bought an app that cost $2 dollars. Then each month you have to   5×8=40
    pay $5 to play online. If she played the game online for 8 months, how   40+2=42
    much money would she have spent total for the app and the online access?

9) At the arcade Sarah had 6 tickets she saved from the last time she went.   2×9=18
    This time she played a game 2 times and earned 9 tickets each time she   18+6=24
    played. How many tickets does she have now?

10) Gwen had 4 math problems to complete. She spent about 9 minutes on   4×9=36
    each problem and then she spent 6 minutes checking her answers. How   36+6=42
    many minutes did she spend total?
