

**Solve each problem.**

**Answers**

- 1) Sarah had thirty-four files on her computer. She deleted six of them and put the rest into folders with seven files in each one. How many folders did Sarah end up with?
- 2) A store had forty-five coloring books in stock. They ended up putting them on sale and getting rid of thirty-three of them. They put the ones they still had onto shelves with two on each shelf. How many shelves did they use?
- 3) Paige baked seventy cupcakes for her school's bake sale. If her brother, Todd, ate forty-two of them how many packages could she make if she put four cupcake in each package?
- 4) For Halloween Lana received thirty-six pieces of candy. She ate twenty-one pieces then placed the rest into piles with three in each pile. How many piles could she make?
- 5) Billy bought thirty-four tickets at the state fair. He spent sixteen tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost nine tickets, how many rides could he go on?
- 6) Amy had sixty-two homework problems. She finished thirty-four of them but still had four pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?
- 7) A waiter had seventy-three customers in his section. If forty-eight of them left and the rest of his tables had five people at each table, how many tables did he have?
- 8) There are seventy-one students trying out for the school's trivia teams. If thirty-nine of them didn't get picked for the team and the rest were put into four groups, how many students would be in each group?
- 9) Gwen picked sixty-two flowers for her friend's wedding. She was making bouquets with five flowers in each one. If thirty-two of the flowers wilted before the wedding, how many bouquets could she still make?
- 10) Nancy uploaded sixty-three pictures to Facebook. She put twenty-three pics into one album and put the rest into five different albums. How many pictures were in each of the five albums?
