Answers

- 1) Olivia earned three points for each bag of cans she recycled. If she had ten bags, but didn't recycle seven of them, how many points would she have earned?
- 2) Sam invited ten friends to a birthday party, but seven couldn't come. If he wanted to buy enough cupcakes so each person could have exactly five, how many should he buy?
- 3) A chef needs six potatoes for a meal. He has already cooked three. If each potato takes six minutes to cook, how long will it take him to cook the rest?
- 4) Cody earned five dollars for each lawn he mowed. If he had four lawns to mow, but forgot to mow two of them, how much money did he actually earn?
- 5) Victor had three action figures, but needed twelve total for a complete collection. If each one costs \$6, how much money would he need to finish his collection?
- 6) At the fair Will bought eleven tickets. After riding the ferris wheel he had four tickets left. If each ticket cost eight dollars, how much money did Will spend riding the ferris wheel?
- 7) Luke had nine video games but four of them weren't working. If he wanted to sell the working games for \$3 each, how much money could he earn?
- 8) A trivia team had twelve members total, but during a game four members didn't show up. If each member that did show up scored five points, how many points were scored total?
- 9) A new building needed nine windows. The builder had already installed five of them. If it takes three hours to install each window, how long will it take him to install the rest?
- 10) A worksheet had eight problems on it. If a teacher had ten worksheets to grade and had already graded eight of them, how many more problems does she have to grade?

Solve each problem.

- 1) Dave bought fourteen boxes of chocolate candy and gave seven to his little brother. If each box has three pieces inside it, how many pieces did Dave still have?
- 2) A new building needed twelve windows. The builder had already installed six of them. If it takes four hours to install each window, how long will it take him to install the rest?
- 3) A trivia team had twelve members total, but during a game eight members didn't show up. If each member that did show up scored five points, how many points were scored total?
- 4) There were seventeen friends playing a video game online when nine players quit. If each player left had four lives, how many lives did they have total?
- 5) Amy earned nine points for each bag of cans she recycled. If she had seven bags, but didn't recycle three of them, how many points would she have earned?
- 6) At lunch a waiter had ten customers and seven of them didn't leave a tip. If he got \$3 each from the ones who did tip, how much money did he earn?
- 7) Kaleb earned five dollars for each lawn he mowed. If he had seven lawns to mow, but forgot to mow three of them, how much money did he actually earn?
- 8) In a video game, each enemy defeated gives you five points. If a level has thirteen enemies total and you destroy all but five of them, how many points would you earn?
- 9) At a restaurant each adult meal costs \$5 and kids eat free. If a group of eleven people came in and nine were kids, how much would it cost for the group to eat?
- 10) Luke invited eleven friends to a birthday party, but six couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?
