

**Determine which choice best answers each question.****Answers**

- 1) Frank's school was collecting cans for recycling. They had 62 bags with 55 cans inside each bag. Which expression show about how many cans they collected?  
A.  $70 \times 50$                       B.  $60 \times 50$                       C.  $60 \times 60$                       D.  $70 \times 60$
- 2) Jerry was placing his spare change into stacks. Each stack had 42 coins. If he had 89 stacks, which expression shows about how many coins he had?  
A.  $40 \times 80$                       B.  $50 \times 90$                       C.  $50 \times 80$                       D.  $40 \times 90$
- 3) Victor had 58 music albums on his computer. If each album was 44 minutes long, which expression shows about how many minutes of music he had?  
A.  $60 \times 40$                       B.  $60 \times 50$                       C.  $50 \times 50$                       D.  $50 \times 40$
- 4) John was building a LEGO tower. He built it 42 stories tall with 47 LEGOs on each story. Which expression shows about how many LEGOs he used total?  
A.  $50 \times 50$                       B.  $40 \times 50$                       C.  $40 \times 40$                       D.  $50 \times 40$
- 5) Larry's Lawn Care charges 47 bucks to mow a customer's lawn for a year. If they have 85 customers which expression shows about how much money they'll make?  
A.  $40 \times 90$                       B.  $40 \times 80$                       C.  $50 \times 90$                       D.  $50 \times 80$
- 6) A store owner was buying uniforms for his employees. If each of his stores needed 76 uniforms and he had 89 stores which expression shows about how many uniforms he'd need?  
A.  $80 \times 80$                       B.  $70 \times 80$                       C.  $70 \times 90$                       D.  $80 \times 90$
- 7) A teacher had 61 students in her classes. If each student completed 16 problems which expression shows about how many problems she'd have to grade?  
A.  $60 \times 20$                       B.  $70 \times 10$                       C.  $60 \times 10$                       D.  $70 \times 20$
- 8) Henry was drawing on scrap paper. He could fit 59 drawings on each page. If he has 57 pieces of paper, which expression shows about how many drawings he could make?  
A.  $60 \times 60$                       B.  $50 \times 50$                       C.  $50 \times 60$                       D.  $60 \times 50$
- 9) Emily was reading through her favorite book series. Each week she read 59 pages. Which expression shows about how many pages she would have read through after 61 weeks?  
A.  $50 \times 60$                       B.  $60 \times 70$                       C.  $50 \times 70$                       D.  $60 \times 60$
- 10) A zoo used 35 pounds of food each day. Which expression shows the amount of food they'd have used after 51 days?  
A.  $30 \times 50$                       B.  $40 \times 60$                       C.  $40 \times 50$                       D.  $30 \times 60$
