Draw each rectangle to the scale shown and determine the new dimensions.

1) The rectangle below has the dimensions:  $3.2 \times 7$ 

Create another rectangle that is scaled to 4 times the size of the current rectangle.

2) The rectangle below has the dimensions:  $4 \times 3.2$ 

Create another rectangle that is scaled to 9 times the size of the current rectangle.

3) The rectangle below has the dimensions:  $3.3 \times 2.4$ 

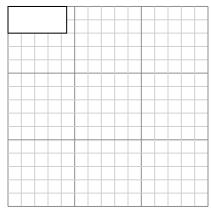

Create another rectangle that is scaled to 9 times the size of the current rectangle.

4) The rectangle below has the dimensions:  $6.3 \times 6.7$ 

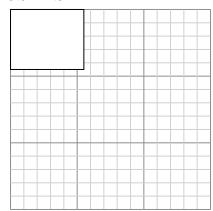

Create another rectangle that is scaled to 4 times the size of the current rectangle.

5) The rectangle below has the dimensions:  $4.4 \times 2$ 

Create another rectangle that is scaled to 9 times the size of the current rectangle.

6) The rectangle below has the dimensions:  $5.5 \times 4.5$ 

Create another rectangle that is scaled to 4 times the size of the current rectangle.

**Answer Key** 

Draw each rectangle to the scale shown and determine the new dimensions.

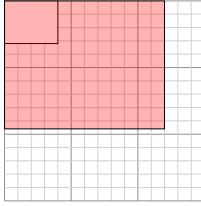

The rectangle below has the dimensions:  $3.2 \times 7$ 

 $3.3 \times 2.4$ 

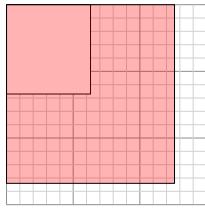

Create another rectangle that is scaled to 4 times the size of the current rectangle.

The rectangle below has the dimensions:  $4 \times 3.2$ 

Create another rectangle that is scaled to 9 times the size of the current rectangle.

3) The rectangle below has the dimensions: The rectangle below has the dimensions:  $6.3 \times 6.7$ 

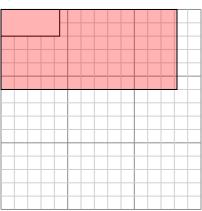

Create another rectangle that is scaled to 4 times the size of the current rectangle.

times the size of the current rectangle.

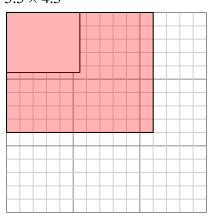

Create another rectangle that is scaled to 9

5) The rectangle below has the dimensions:  $4.4 \times 2$ 

Create another rectangle that is scaled to 9 times the size of the current rectangle.

The rectangle below has the dimensions:  $5.5 \times 4.5$ 

Create another rectangle that is scaled to 4 times the size of the current rectangle.

- $6.4 \times 14$

- 11×9
