Solve each problem.

- 1) Bianca heated up a slice of pizza in the microwave. When she got the pizza out it was 145°F. If the microwave heated it up 37°, what temperature was it when she originally put the pizza in?
- 2) When Lana went to the park at 2:30 it was 60°F. By the time she left it had gotten 17° warmer. What temperature was it when she left the park?
- 3) Tiffany measured the temperature of her soda and found that it was 88°F. After putting it in her freezer for an hour it was 77°F. How much did the freezer cool her soda down?
- **4**) The temperature in the morning was 80°F. By the afternoon it was 95°F. How much did the temperature change?
- 5) In March, the average temperature in Oklahoma was 50°F, while the average temperature in Texas was 15° warmer. What was the average temperature in Texas?
- 6) A desert in Africa had an average temperature last year of 109°F. If the average temperature this year was 20° warmer, what is the average temperature this year?
- 7) An industrial machine is 173°F when it's being used. After being unused for an hour the machine cools down 46°. What temperature is the machine after it cools down?
- 8) When Frank went to the beach in the morning it was 61°F. When he came back later in the afternoon it was 77°F. What is the difference in temperature between the morning and afternoon?
- 9) A city in Alaska had a temperature of 88°F during the day, but at night the temperature dropped 30°. What temperature was it at night?
- 10) The instructions to cook a turkey say to set the oven at 363°F. If Katie set her oven 19° cooler than the instructions said, what temperature did she set her oven?
