Determine the elapsed time for each problem.

1) Frank finished his homework at $8: 45$. If he started working on it at $6: 45$, how long did it take him to finish?
2) Sam started looking for his missing cat at $4: 05$. If he found it at $5: 55$, how long did he spend looking?
3) Bianca's band practice started at $6: 45$. If the practice ended at $8: 55$, how long did it last?
4) Tiffany took a train from her house to the state capitol. The train left at 1:00 and got to the capitol at $4: 50$. How long was the train ride?
5) Victor was invited to birthday party that started at $6: 15$. If the party ended at $8: 45$, how long did the party last?
6) Will started reading a book at $3: 05$. If he finished it at $4: 45$, how long did he spend reading?
7) Haley finished washing clothes at $6: 35$. If she had started at $5: 35$, how long would she have spent washing clothes?
8) Rachel and her friends left for the park at $3: 30$. If they got back at $6: 15$, how long were they at the park?
9) Edward woke up from a nap at 4:10. If he originally went to sleep at $2: 30$, how long was his nap?
10) Isabel's parents left to go shopping at $2: 50$. If they got back home at $4: 20$, how long were they gone?

Determine the elapsed time for each problem.

1) Frank was invited to birthday party that started at $4: 05$. If the party ended at $6: 10$, how long did the party last?
2) Carol took a train from her house to the state capitol. The train left at $4: 15$ and got to the capitol at 8:00. How long was the train ride?
3) Bianca went to the town carnival. She arrived at $4: 25$ and left at $6: 25$. How long did Bianca spend at the carnival?
4) Tiffany finished washing clothes at $6: 25$. If she had started at $5: 25$, how long would she have spent washing clothes?
5) Victor started reading a book at $6: 15$. If he finished it at $10: 10$, how long did he spend reading?
6) Nancy drove to her aunt's house, arriving at 7:35. If Nancy started her drive at 4:20, how long did the drive take?
7) Haley was helping her mom cook dinner. They finished the meal at 6:05. If they started cooking at 3:55, how long did it take them?
8) Rachel and her friends left for the park at $2: 20$. If they got back at 5:50, how long were they at the park?
9) Edward started playing video games at 3:10. If he took a break at 5:45, how long had he been playing?
10) Isabel went to the movies at $2: 15$. If the movie was over at $5: 15$, how long did the movie last?
