## Rewrite each number sentence using numerals and symbols.

- 1) The difference between twelve and F is eight
- 2) three times A equals six
- 3) B divided by ten equals ten
- 4) eight plus U equals sixteen
- 5) The difference between twelve and Y is six
- **6**) two times E equals twelve
- 7) M divided by ten equals ten
- **8**) The sum of C and eight is eleven
- **9**) D minus seven equals one
- **10**) The product of B and eight is eight
- 11) one hundred divided by R equals ten
- **12**) ten plus K equals nineteen
- 13) W minus ten equals five
- **14**) six times N equals fifty-four
- **15**) A divided by ten equals ten
- **16)** T plus seven equals nine
- **17**) seven minus H equals five
- **18**) The product of six and G is twelve
- **19**) one hundred divided by Z equals ten
- **20**) The sum of P and eight is sixteen

## Answers

$$12 - F = 8$$

$$3 \times \mathbf{A} = \mathbf{6}$$

$$\mathbf{B} \times \mathbf{10} = \mathbf{10}$$

$$8 + U = 16$$

$$12 - Y = 6$$

$$\mathbf{2} \times \mathbf{E} = \mathbf{12}$$

$$7. \quad \mathbf{M} \times \mathbf{10} = \mathbf{10}$$

$$C + 8 = 11$$

$$\mathbf{D} \cdot 7 = \mathbf{1}$$

$$\mathbf{B} \times \mathbf{8} = \mathbf{8}$$

$$11. \quad 100 \times \mathbf{R} = 10$$

12. 
$$10 + K = 19$$

$$W - 10 = 5$$

$$14. 6 \times N = 54$$

$$15. \quad \mathbf{A} \times \mathbf{10} = \mathbf{10}$$

16. 
$$T + 7 = 9$$

17. 
$$7 - H = 5$$

$$_{18.} \qquad \mathbf{6} \times \mathbf{G} = \mathbf{12}$$

$$_{19.}$$
  $100 \times Z = 10$ 

$$P + 8 = 16$$
